- TITLE:** Evaluation of Parker Compound L1186-80
- PURPOSE:** To provide a general profile of this compound.
- CONCLUSION:** Parker Compound L1186-80 exhibits excellent tear resistance in addition to its superior compression set resistance. This compound should be considered for applications requiring resistance to wear and abrasion; applications requiring fluid and compression set resistance.

Recommended temperature limits: -90 °F to 350 °F

Recommended For

Aromatic mineral oils (IRM 903 oil)
Petroleum oils
Low molecular weight automatic hydrocarbons (benzene, toluene)
Jet Fuels
Chlorinated Solvents
Dry heat and low temp

Not Recommended For

Phosphate-esters
Acids
Ketones
Amines (ammonia)
Auto and aircraft brake fluids
