RE: ESP International CBAM Regulations Compliance Statement

As part of our ongoing commitment to regulatory compliance and environmental transparency, we confirm that the goods and services we provide to our customers fall **outside the scope** of the **European Union's Carbon Border Adjustment Mechanism (CBAM)**.

CBAM currently applies to imports of the following product categories:

- Raw Iron and Steel
- Raw Aluminum
- Fertilizers
- Hydrogen
- Electricity
- Cement

After a thorough review of our product portfolio and service offerings, we confirm that we do **not** engage in the import, production, or supply of any goods falling under these CBAM-regulated sectors. Therefore, our operations are **not subject** to CBAM requirements, such as emissions reporting, certificates procurement, or embedded carbon verification.

We will continue to monitor the evolving regulatory landscape to ensure ongoing compliance, and we are committed to maintaining a transparent dialogue with our stakeholders on all matters related to sustainability and responsible sourcing.

Should CBAM expand its scope in the future, we will reassess applicability and take all appropriate measures to comply.

Sincerely,

Zach McCauley
Customer Experience Manager
