

We make small parts a big part of your bottom line.

INTERNATIONAL™
An Employee-Owned Company

ESP offers a suite of products and services that are critical to global OEMs.

ESP has developed in-house engineering that helps design OEM components such as seals, metal castings and forgings, and also provides value-added assembly, inventory management programs and supply chain logistics. After working with customers on design, ESP then uses its qualified domestic and global sources to find the best cost manufacturer of the component. ESP can then provide any necessary subassembly or add the components to a highly automated inventory management program.

ESP continues to increase the value added to our customers' bottom line with successfully implemented engineering services, assembly services, assembly fixtures, kitting, global supplier qualification, vendor optimization and the technology to efficiently manage a process from sourcing to manufacturing plant delivery.

On the ground. Around the globe. ESP is there.

Worldwide Presence

ESP has a global strategy with physical locations in China, India and Taiwan. We made the decision that the best way to participate in globalization was to follow our customers around the globe.

SERVICES

- SIMPLE AND COMPLEX ASSEMBLY OPERATIONS
- ENGINEERING DESIGN AND APPLICATION
- GLOBAL SERVICES
- SEAL AND GASKET FABRICATION
- QUALITY INSPECTION SERVICES
- MARKET ANALYSIS

- VENDOR MANAGED INVENTORY PROGRAMS
- AFTERMARKET AND PRODUCTION KITTING AND BUNDLED SERVICES
- RAPID PROTOTYPING
- FIXTURE DESIGN

We understand the challenges in reaching your goals.

ESP designs product and service solutions that help you remain competitive in today's global marketplace. We make your production and procurement process more efficient by allowing you to focus on your core competencies. From multiple component assembly with in-line testing to simple seal and component supply, ESP will improve your bottom line with cost effective support and service.

ESP adds value when your margins are on the line.

ESP International provides the OEM market with an ever-expanding selection of components including quality seals, rubber products, cast and forged metals, weldment conversions, and custom manufactured parts.

PRODUCTS

- SEALS, PACKING AND GASKETS
- OIL SEALS AND FACE SEALS
- MOLDED RUBBER AND PLASTICS
- METAL AND MACHINED COMPONENTS
- CLASS C ITEMS

ESP offers strategic solutions – not internal strategies.

We collaborate with OEMs on core product and process drivers that improve production outputs while reducing overall business costs. This collaborative process includes the elements of product development, process management, market valuations, solution costs and projected profitability. Additionally, solutions are discreetly delivered to assure our OEM customers of a competitive advantage.

Game changing ideas are derived from our broad and deep expertise and experience with the disciplines of marketing, product engineering and supply chain management. These ideas become commercialized value for our OEMs.

Engineered solutions that are comprehensive and creative.

Just like our engineers.

ENGINEERING

- BEST FIT MANUFACTURING PRACTICES
- TECHNICAL REFERENCE GUIDES
- PRODUCT DESIGN AND DEVELOPMENT
- TECHNICAL SUPPORT AND SEMINARS
- PRODUCT COST ANALYSIS

We provide customers with market insights and added value information.

ESP International has over 40 years of success in delivering bottom-line solutions for OEMs that cover the spectrum from specific product enhancements to comprehensive, supply chain management.

ESP has facilities, talent and qualified sources around the globe allowing us to pick the best operating and cost models for our customers of all sizes. With ESP's resources, OEMs of all sizes and capabilities can plug into ESP's global resources to gain an engineering and global platform or enhance their current model.

At ESP, we can take a micro look at your specific challenges or we can embrace your entire enterprise at the macro level. Either way, your company can benefit with improved outputs while reducing your overall cost of doing business.

Quality planning, using proven expertise delivers turn key solutions you can count on.

QUALITY SERVICES

- QUALITY CONTROL
- QUALITY INSPECTION (US & ASIA)
- QUALITY MANAGEMENT
- MATERIALS LAB
- ONSITE INSPECTION
- SUPPLIER AUDITS

Every goal has to start somewhere.

We'll start the discussion with two simple, but critical questions:
"What are your business goals?" "What are the barriers to achievement?"

By beginning with business goals and barriers, we can be confident that our solutions will have quantitative impact with customer satisfaction and the bottom line. The first means your brand will gain preference while the latter means ROI gains. Combined, your company will be able to demonstrate competitiveness and profitability that are the ingredients to sustainability.

Be assured that ESP will challenge you about status quo and will help you with continuous improvement. We know that winning is not something you do once in a while, but it is achieved with incremental improvements every shift of every day.

Point A to point Z. And everywhere in-between.

SUPPLY CHAIN MANAGEMENT

- JUST-IN-TIME STRATEGIES
- SUPPLIER DEVELOPMENT
- SOURCE SELECTION
- LOGISTICS
